

Wine Bar

Bank st , Bridgeport, CT 06604

The concept behind my design is to make this place a blend of transitional between traditional and contemporary styles by emphasize classic, timeless, and cleanliness with creating a dynamic interplay of light and color of the space. Transitional design focuses on comfort and balancing with simplicity of detail and sophisticated finishes. The bar will be inspired by clock wise and lounge inspired by stable of the outstanding view of McLevy park cross street. There will be abundant of natural light to reduce the need of artificial textures.
